Governing Equation for
isolation frequency

$$f_{\text{isolation}} = \frac{1}{2\pi} \sqrt{\frac{4K\eta g}{R_{\text{LIVE}}(R_{\text{LIVE}} - 1)\pi d_i^2 l_i \rho_i}}$$

Fig. 19A

Fig. 19B

Area ratios

$$R_{\text{piezo}} = \frac{(2.1884)^2}{(1.1447)^2} = 3.65$$

Length and number of turns of fluid tuning passage

$$l_i = \frac{4K\eta g}{R_{\text{LIVE}}(R_{\text{LIVE}} - 1)\pi d_i^2 \rho_i (2\pi f_{\text{isolation}})^2}$$

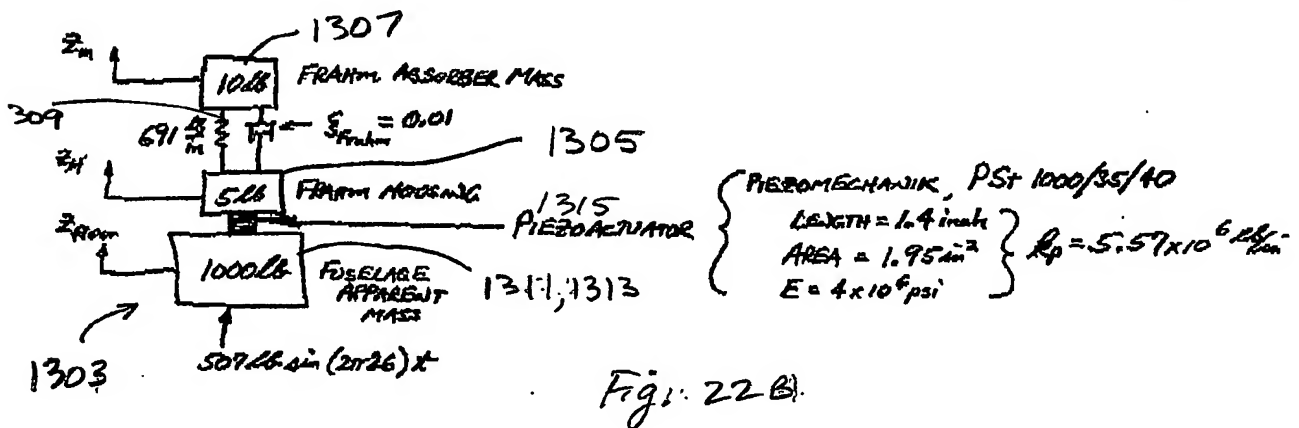

$$N = \frac{l_i}{2\pi r_i}$$
